5	Django	Python-based web framework used for backend development
6	MVT	Model-View-Template architecture used in Django
7	DB	Database used to store application data
8	UI	User Interface of the application
9	URL	Uniform Resource Locator used for routing
10	CRUD	Create, Read, Update, Delete operations

Executive Summary

This internship was undertaken with the objective of gaining practical knowledge in web development and understanding how real-world web applications are built and deployed. The internship program was divided into three major phases: a **training phase**, **assessment phase** and a **project phase**, both of which contributed significantly to my technical and professional growth.

The primary learning objective of this internship was to build a strong foundation in **frontend web technologies** and to explore **backend development** concepts. During the training phase, I learned and practiced **HTML, CSS, JavaScript, and Bootstrap**. I gained knowledge of creating structured web pages, applying styles for better user experience, adding interactivity using JavaScript, and designing responsive layouts using Bootstrap. This phase helped me understand the importance of clean UI design and responsive web development.

In addition to the guided training, I independently explored the **Django framework** to understand backend development. This self-learning approach helped me understand concepts such as URL routing, views, templates, models, database connectivity, and the Model-Template-View (MTV) architecture used in Django.

During the project phase, I applied the learned concepts to develop a full-stack e-commerce web application named **"Shop-Seed."** The project involved designing frontend pages, implementing user authentication, managing products, developing a cart system, and integrating backend logic with the database. I also worked on handling static files and media files such as product images and learned to use the Django admin panel for managing application data.

Throughout the internship period, I performed various activities including frontend design, backend exploration, project development, debugging errors, and improving application functionality. I also learned how to search for documentation, understand errors, and solve problems independently.

By the end of the internship, I achieved a clear understanding of **full-stack web development**, improved my coding skills, and gained confidence in developing real-world web applications. This internship provided valuable hands-on experience and helped bridge the gap between theoretical knowledge and practical implementation, preparing me for future academic projects and professional opportunities.

Overview of Organization

EISystems Services is an Indian technology training organization that provides industry-oriented workshops and programs in emerging domains like **Cybersecurity, Machine Learning, IoT, Robotics, and Artificial Intelligence**. The company focuses on bridging the gap between academic learning and real-world industry requirements by offering practical, hands-on training to students and professionals. EISystems has conducted training programs across many reputed engineering colleges and universities in India, helping learners build strong technical skills and improve their career readiness.

Vision of the Organization

The vision of EISystems Services is to empower students and professionals with industry-relevant technical skills and help them become confident, skilled, and job-ready in emerging technologies.

Mission of the Organization

The mission of EISystems Services is to bridge the gap between academic knowledge and industry requirements by providing practical, hands-on training, workshops, and real-world project exposure in modern technology domains.

Values of the Organization

- Commitment to quality technical education
- Focus on practical and industry-oriented learning
- Encouraging innovation and continuous learning
- Supporting student growth and skill development
- Maintaining professionalism and ethical practices

Organizational Policy in Relation to the Intern Role

EISystems Services follows a learner-centric internship policy that focuses on skill development and practical exposure. Interns are encouraged to work on real-time projects under proper guidance and mentorship. The organization provides a supportive learning environment where interns can enhance their technical knowledge, improve problem-solving skills, and gain hands-on experience.

Project Summary-Shop-seed

(ECOMMERCE SITE FOR MANAGING BOTH B2B AND B2C BUSINESSES)

Shop-Seed is a Django-based e-commerce web application developed by me to understand how real online shopping platforms work. The main aim of this project is to build a complete system where users can register, browse products, add items to a cart, and place orders easily.

In this project, I implemented **user authentication**, including login, signup, and profile management. The platform also supports **seller accounts**, where sellers can register, manage their profiles, and add or update products with images. All products, users, and orders are stored securely in the database and managed efficiently.

The **cart system** is session-based, allowing users to add, remove, and view products before checkout. The admin panel provided by Django is used to manage users, products, and website content, which makes the system easy to control and maintain.

Shop-Seed is developed using **Django's Model-Template-View (MTV) architecture**, which helped me keep the code organized and easy to understand. The project also includes proper handling of static files and media files such as product images.

Overall, this project helped me gain practical experience in **backend development, database management, and full-stack web application design**. Shop-Seed can be further improved by adding online payment integration, order tracking, and advanced security features.

Student *Self Evaluation of the Short-Term Internship*

Please rate your performance in the following areas:

1) Oral communication	*	*	*	*	
2) Written communication	*	*	*	*	
3) Initiative	*	*	*	*	
4) Interaction with staff	*	*	*	*	*
5) Attitude	*	*	*	*	*
6) Dependability	*	*			
7) Ability to learn	*	*	*	*	*
8) Planning and organization	*	*	*	*	*
9) Professionalism	*	*	*	*	
10) Creativity	*	*	*	*	*
11) Quality of work	*	*	*	*	*
12) Productivity	*	*	*	*	
13) Progress of learning	*	*	*	*	*
14) Adaptability to organization's culture/policies	*	*	*	*	
15) OVERALL PERFORMANCE	*	*	*	*	

Rating Scale: 5 will be Best while 1 will be Worst

Daily Activity Report

Week No: 01
(1/2/3/4/5/6/7/8/9/10/11/12/13/14/15/16)

Day & Date	Brief Description of Daily Activity	Learning Outcome	Person In-Charge
Day 1 22/12/2025	Description About this Internship.	At day-01 of my internship we learn internship terminology which contain 3 things TAP means Training Assessment and Projects.	Mayur Sir
Day 2 23/12/2025	Web Terminology like How website actually works.	We able to understand how actually works and response when user intracts through it.	Mayur Sir
Day 3 24/12/2025	What is HTML and why we use it.	This day we learn about html which means hyper text markup language which acts as a human scalaton.	Mayur Sir
Day 4 25/12/2025	What is CSS and why we use it.	This day we learn about css which stands for cascading style sheet.which is most important for adding style in web pages like human with best dress and looks.	Mayur Sir Mallika Mam
Day 5 26/12/2025	What is Bootstrap and why we use it.	At upper part we learn to build website using html and css which needs to design every things from scrach.thats make work slow.for fast work and delivery of website we use bootstrap also we grid propery thats helpful for making dynamic website easily.	Mayur Sir Mallika Mam
Day 6 27/12/2025	Practice	We practice all upper things and making a static website thats	Mayur Sir

		build using html css bootstrap.	Mallika Mam
Day 7 28/12/2025	Live Session on Website Development on Javascipt And done assessment on Python and Object And Exception Handling	Learned and Practiced Javascript codes on ,Objects in JS ,String ,Date Methods ,Query Selector	Mayur Sir Mallika Mam

Week No: 02
(1/2/3/4/5/6/7/8/9/10/11/12/13/14/15/16)

Day & Date	Brief Description of Daily Activity	Learning Outcome	Person In-Charge
Day 1 29/12/2025	<p>What is Javascript and why javascript important now days.</p> <p>Basics of Javascript like printing things on console datatype variable conditionals.</p> <p>Loops like for,while ,do-while,for each in javascript.Strings and Some string methods,Array and Array method Objects and some objects method.Functions in javascript.</p>	<p>At day-01of my second week of my internship we learn an interesting things called javascript thats brings functionality in website .We can't imagine things like human without function like died human same website without javascript looks dead.javascript add intractiveness and provide best user experience.we learn basics things thats help me to build logic with the help of conditionals and important datatypes like an array , strings ,objects.that</p>	<p>Mayur Sir</p> <p>Mallika Mam</p>

		help me works on collection of data effectively. etc.	
Day 2 30/12/2025	Events in js.	At this phase we learn various types of event like click, double click, mouse hover in , mouse hover out etc.	Mayur Sir Mallika Mam
Day 3 31/12/2025	DOM in js.	DOM stands for document object model called dom manipulation.which helps access though id or class etc.	Mayur Sir Mallika Mam
Day 4 01/01/2026	Practice & live session on Projects Work.	At this phase we explore some backend technology like python django which is popular for making website by following mvt architecture called model view template.	Mallika Mam
